- Displays ***FULL*** screen on a variety of monitor resolutions
- Supports Dual Monitors
- 120 hi-resolution C1-C6 Corvette images
- Constant movement slide and zoom effects
- Optional screensaver password
- Optional 120 transitional effects

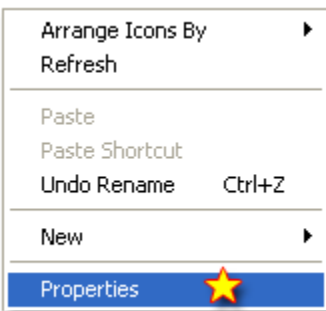

Installation of Screensaver

- Extract the contents of the screensaver **ZIP** file
- When installing the “**Corvette Screensaver C1-C6.exe**” file, run the file by double clicking on the file name in the Explorer or by selecting “Run” from the Taskbar’s Start menu.
- The recommended install directory is: **C:\Windows**

Uninstalling the Screensaver

- Select: **Start** —> **Programs** -> **Corvette Screensaver C1-C6.exe** —> **Uninstall**
- Optionally, you can remove the screensaver from the **Control Panel**

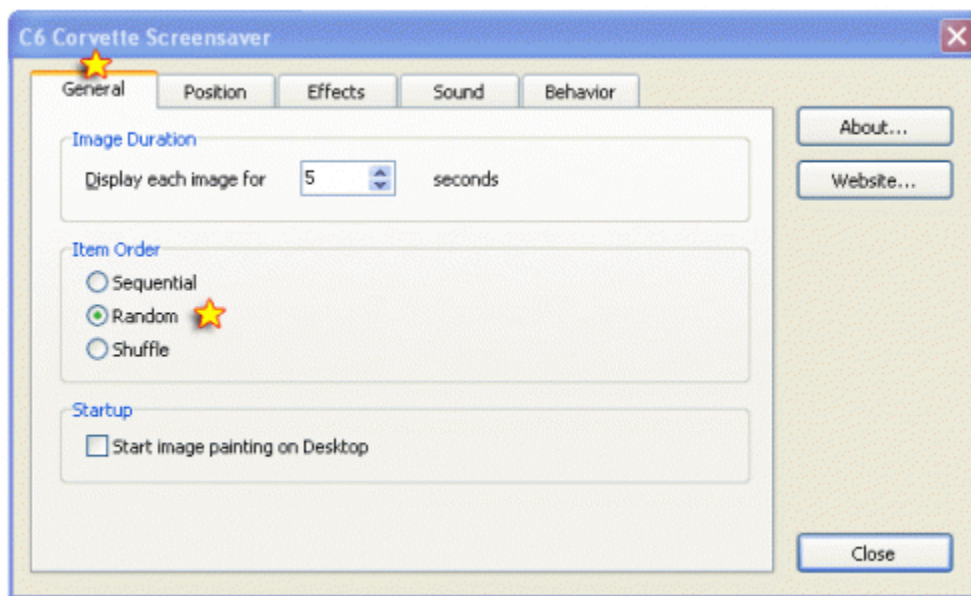

Changing Screensaver Properties

Right click on your **DESKTOP** and select **PROPERTIES**.

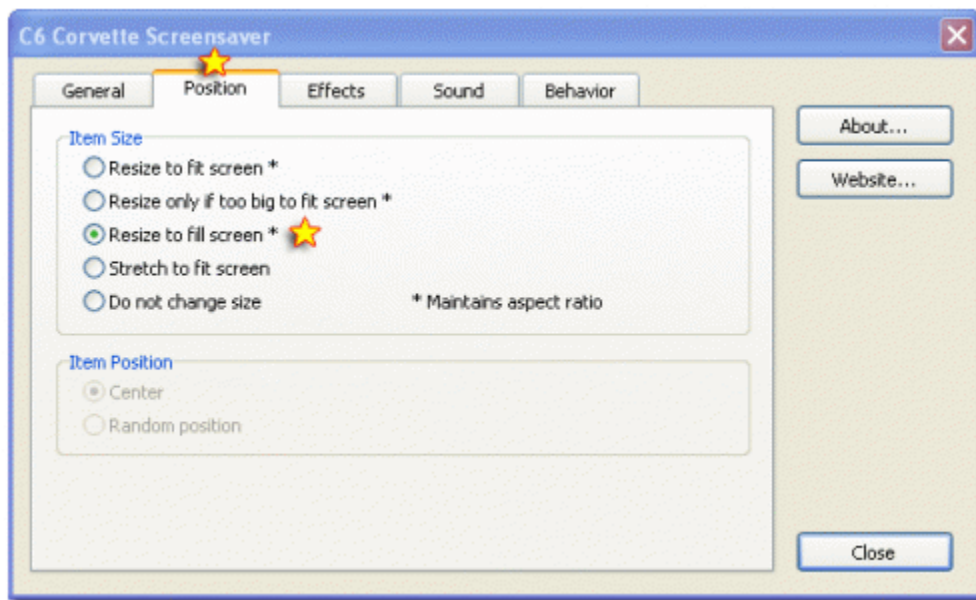

Choose the **SCREEN SAVER** tab, then click on the **SETTINGS** button.

The viewing sequence is set to **RANDOMIZE** a new picture every 5 seconds. The images will appear in an undetermined order. Some images may repeat before all are displayed.

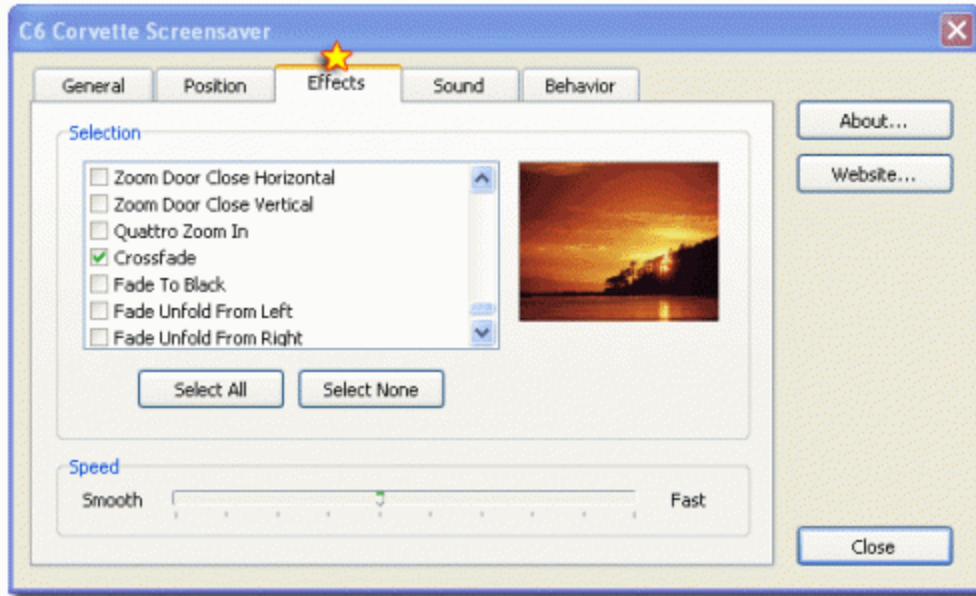

If you decide to select **SEQUENTIAL**, this will show all the images in a predefined order.

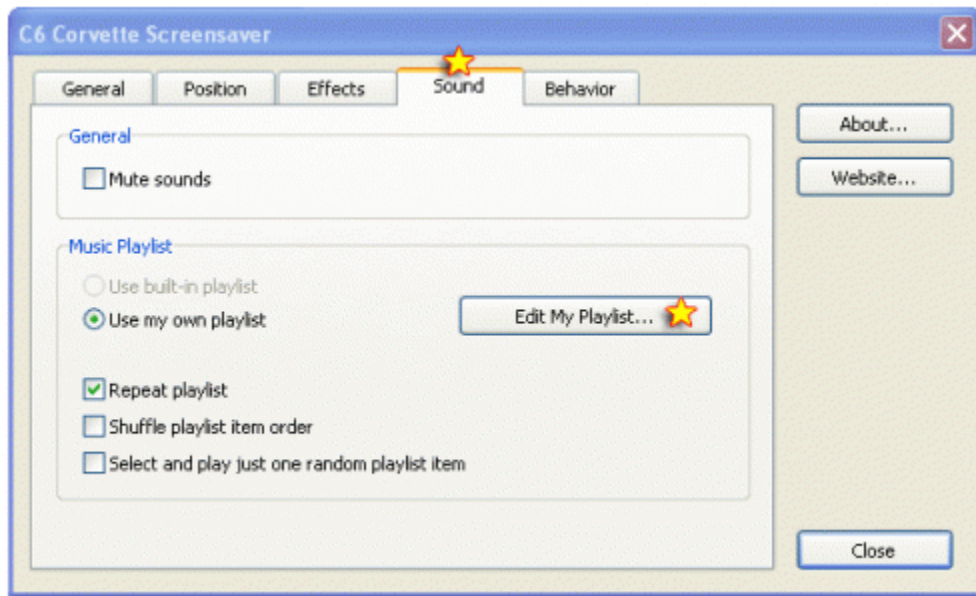

The default image size is **RESIZE TO FILL SCREEN**. This yields full screen viewing for all of the images in 8:5 ratio monitors (including 16:10 widescreen HD).

For older monitors (4:3 aspect ratio) and some HD monitors (16:9 ratio), cropping may occur.

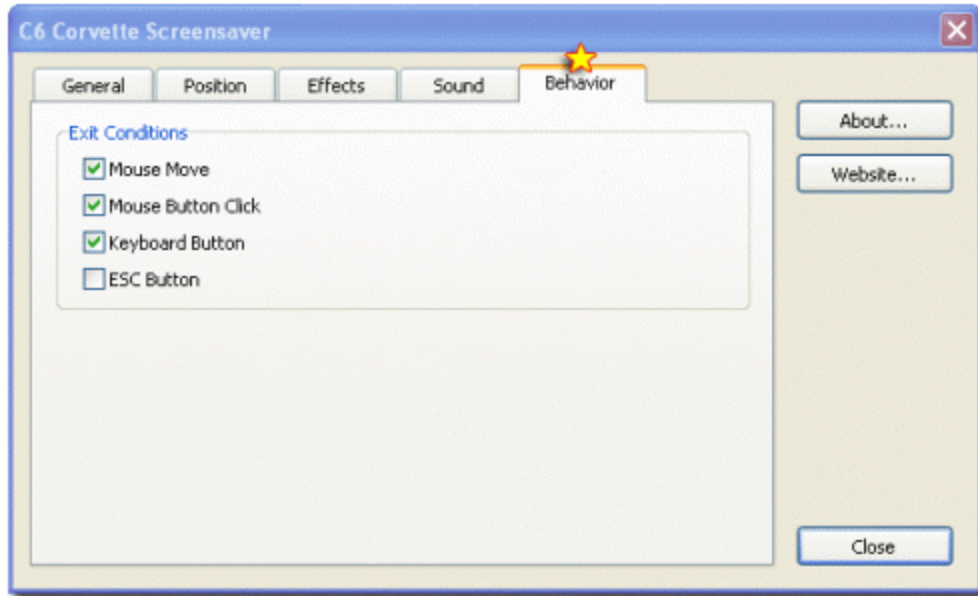

To prevent cropping, we suggest **Resize to FIT screen**.

You have a choice of 120 smooth image **EFFECTS** between slides. The default is **Crossfade**.

SOUND is not included, but you have a choice of selecting your own music from your computer hard drive.

EXIT CONDITIONS can be customized to your own preference.
